Honeywell Voice  |  We Move People

LEARN MORE
GUIDE WORKERS WITH CLEAR DIRECTIONS IN THEIR LANGUAGE.

Honeywell Voice understands more than 40 languages and delivers easily understood instructions through a headset to direct your mobile workers to the next location. Then, it guides those workers through the required tasks or steps to complete processes, such as:

- Picking
- Inventory replenishment
- Maintenance and repairs
- Shipping
- Receiving

As each step is completed, mobile workers speak a verbal confirmation in their native language into the headset microphone. Honeywell Voice converts workers’ responses into data and communicates it back to your host system to update inventory records in real time.
SEAMlessly Integrate Voice with Your Processes.

From receiving to picking to shipping and flexible for operations of all sizes, Honeywell Voice software integrates with host systems of all types, including:

- Legacy home-grown systems
- Warehouse execution systems (WES)
- Warehouse management software (WMS) platforms
- Enterprise resource planning (ERP) solutions for large organizations, such as SAP S/4HANA® and ERP for small to medium enterprises such as SAP® Business One or Microsoft Dynamics 365
3. COLLECT AND ANALYZE WORKER AND PROCESS DATA.

Advanced data collection, automated documentation and analytics capabilities enable you to optimize your mobile workforce’s productivity while ensuring process compliance.

With Honeywell Voice, you can:

- Monitor real-time throughput targets and inventory levels
- Ensure continuous process improvements
- Make better informed decisions to move the business forward and meet predicted demands

In addition, Honeywell Voice data is easily integrated into labor management systems (LMS) or off-the-shelf business information (BI) visualization tools.
Voice guidance gets your workers where they need to be, when they need to be there. Reliable “text-to-speech” and “speech-to-text” technologies, paired with durable, wearable mobile devices, help workers to hear and respond in noisy and tough conditions.

The robust Honeywell Voice solution is comprised of:

- Rugged, noise-suppressing headsets with SoundSense™ technology
- Directional microphones that deliver clear, crisp audio from your workers
- A wearable mobile device to interface with Honeywell Voice
- Advanced software to integrate with your preferred host system
TRANSFORM EQUIPMENT INSPECTIONS, MAINTENANCE AND REPAIRS.

Step-by-step voice guidance through maintenance, inspection or repair procedures can minimize planned and unplanned disruptions to your operations. Every action is documented.

Moreover, with Honeywell Voice, you can ensure strict compliance with regulations and standard operating procedures (SOPs).

1. Guide workers with clear directions in their language.
2. Seamlessly integrate voice with your processes.
3. Collect and analyze worker and process data.
4. Overcome noisy and tough environments.
5. Transform equipment inspections, maintenance and repairs.
6. Improve operations to achieve business goals.

Honeywell
Instead of wandering around with their hands full of paper, workers guided by voice can focus on picking products, repairing equipment, or learning a new task.

With Honeywell Voice, you can improve operations throughout a DC or warehouse, such as:

- Increase productivity more than 35 percent
- Correct up to 80 percent of picking errors
- Achieve 99.99 percent order accuracy rates
- Improve worker safety up to 20 percent
- Reduce training time up to 85 percent

Voice-guided workflows direct your associates — working both hands-free and eyes-free — through their mobile workflows to minimize steps and maximize efficiencies. You can run a smarter, better business as a result.
